

Study at EURECOM: Give a European dimension to your degree while graduating from CHALMERS !

As a member of the EURECOM's consortium: Chalmers can give the opportunity to its students to spend part of their degree in the latest hi-tech facilities of EURECOM on the French Riviera!

A cutting-edge graduate program

Students can complete their initial studies with an attractive offer of classes at EURECOM. Courses are regularly updated and benefit from EURECOM's strong links with the industry and advanced research.

A unique international exposure

EURECOM is the unique French graduate school who is administered by a consortium of leading international companies and prestigious universities. This characteristic guarantees that teaching meets international quality standards and is relevant to the industry.

Innovative study tracks

To help students select their courses, the curriculum is organized around study tracks in line with EURECOM's main research interests:

- Data Science
- Internet of things
- Digital Security
- Intelligent communication Systems
- Embedded Systems

ASSETS of EURECOM:

A small campus (around 300 master students and 85 Phd students) which favors a rich student life and provides for individual monitoring by professors and staff.

International classes of students: 70% of international students from 40 nationalities.

All classes are taught in English. (French knowledge is not necessary).

Our professors are recruited on an international basis among the best in their field of expertise. All of them are involved in international research projects and publish in prestigious conferences.

EURECOM's strong connections with the industry guarantee that courses fit the current needs of business and prepare students to adapt to a fast-changing competitive world

An unparalleled location: EURECOM is based on Europe largest science park (Sophia Antipolis), 10 min from the Mediterranean beaches and 1 hour from the ski slopes
