

ENHANCE Summer School in Sustainable Entrepreneurship and Innovation

Tracks course TRA105

What?

This Action-based Summer School offers learning-by-doing within the area of sustainable entrepreneurship and innovation and other topics related to the main theme. Students will work on a class-wide real-life project of helping others to engage in entrepreneurship more sustainability, viewing entrepreneurship as new value creation for others (not only creating wealth for oneself).

Who?

To be eligible to apply, applicants must be enrolled at a Master's or doctoral level and have successfully completed at least one semester at one of the ENHANCE partner universities before the start of the Summer School. A CEFR B2 English proficiency level is expected, although no formal test is required. Each ENHANCE partner university will select five students to participate in the Summer School, in total 35 students. The selection will be based on the applicants' motivational letter where they explain why they are suitable to be part of this summer school.

How?

This Tracks course is a Summer School that awards 7.5 ECTS and runs between July 1st and September 30th with a one-week, mandatory, intensive training at Chalmers University of Technology, Gothenburg, Sweden, between August 22nd - 28th. Before and after this intensive week, students will carry out 'academic' research in teams, with the overall aim of creating value for people around Europe. This focuses students' awareness and trains their ability in sustainable entrepreneurship. The hope is that the Summer School will provide the basic knowledge and skills to prepare students to translate innovative ideas into viable and sustainable entrepreneurial initiatives.

**Application
deadline**
May 23rd
